based on feedback the authors have streamlined their bestselling reference to zero in on just the clinical answers ophthalmologists need in day to day practice this new edition presents unparalleled guidance on nearly every ophthalmic condition and procedure

the eye 3rd edition volume la vegetative physiology and biochemistry is devoted to the vegetative physiology and biochemistry of the eye the book reviews significant progress in the anatomy of the eye and its physiological and biochemical aspects particularly the structure of the tissues concerning the ocular fluid the flow of aqueous humor

measurement of the intraocular pressure and the macromolecular composition of the vitreous this edition is organized into four chapters and begins with an overview of the anatomy of the human eye paying particular attention to the orbit and adnexa the eyeball and motor and supporting apparatus of the eye the reader is then introduced to the formation of ocular fluid the structures in immediate contact with it in the ciliary body and the anatomical aspects of the vascular circulation in the ciliary body an account of the chemistry of the aqueous humor and factors affecting the intraocular pressure is also given the book concludes by discussing the structure and function of the vitreous focusing on the gel vitreous and liquid vitreous as well as the rheological state and concentration of collagen naha and proteins in the vitreous of various species from humans to frogs this book is of interest to students and researchers in fields ranging from ocular science to physiology and biochemistry

this book is intended for the medical student and non specialist postgraduate it is being published at a time when hospital waiting lists for eye care in great britain have reached record levels and the need for more teaching at medical student level is becoming imperative in many medical schools the students have very little exposure to the specialty some students none at all this may be because in past years the emphasis has been on teaching ophthalmology at a postgraduate level and a considerable development of postgraduate teaching has occurred it had been inferred that more exposure of qualified general practitioners to the subject would reduce the hospital waiting lists since more eye care would take place in general practice it would appear that the reverse has taken place general practitioners being now more aware of eye problems send even more cases to the hospitals in the absence of an expansion of the hospital service there is an urgent need to improve primary care ophthalmology and this can best be done by placing more emphasis on the teaching of medical students it is against this background that the need to provide a new basic textbook in ophthalmology arises the book is therefore aimed primarily at the medical student it does however aim to make preliminary reading for the postgraduate student

i have been a student of sjogren s syndrome for virtually all of my professional life my education in this disease began in 1962 when i arrived at the national institutes of health to begin a clinical asso ciateship with dr joseph j bunim bunim introduced me to a pat ient with sjogren s syndrome of 8 years duration who had devel oped malignant lymphoma 6 months previously he told me that there were other such patients i obtained serum samples from these patients and studied them by the then new technique of immuno electrophoresis we observed that an initial hypergammaglobulin emia could progressively decline to hypogammaglobulinemia with loss of autoantibodies one patient in this initial series

had macrog lobulinemia we published this report and suggested that the auto immunity predisposed to the malignant transformation thus began my love affair with this disease in those days many rheumatologists considered sjogren s syndrome simply a variant of rheumatoid arthritis it s curious that two decades ago there was little confusion between sjogren s syndrome and systemic lupus erythematosus whereas today there is great con fusion there is still a great need for internationally agreed upon di agnostic criteria which merely illustrates once again the difficulty of accurate diagnosis in our profession the multidisciplinary aspects of sjogren s syndrome require au thorities in several areas of medicine the various chapter contribu tors are experts in their field and have often put aside other respon sibilities to complete their contributions and not delay publication

clinical ocular pharmacology second edition covers the diagnostic and therapeutic clinical procedures in the administration of drugs to the eye this book is organized into five parts encompassing 35 chapters that evaluate the basic pharmacologic principles that govern the different types of ophthalmic drugs it addresses the pharmacologic agents useful in the diagnosis and treatment of ocular diseases some of the topics covered in the book are the basic science of ocular pharmacology clinical administration of ocular drugs drugs affecting the autonomic nervous system types of local anesthetics review of anti inflammatory drugs and examination of inhibitors of aqueous formation other parts deal with the development of contact lens solution in clinical practice and the pharmacologic management of strabismus these topics are followed by discussions of the legal basis of using drugs in optometry and the systemic effects of ocular drugs the concluding part is devoted to the diseases of the optic nerve the book can provide useful information to doctors optometrists pediatricians students and researchers
